LPSS : Update

Stephen Downes
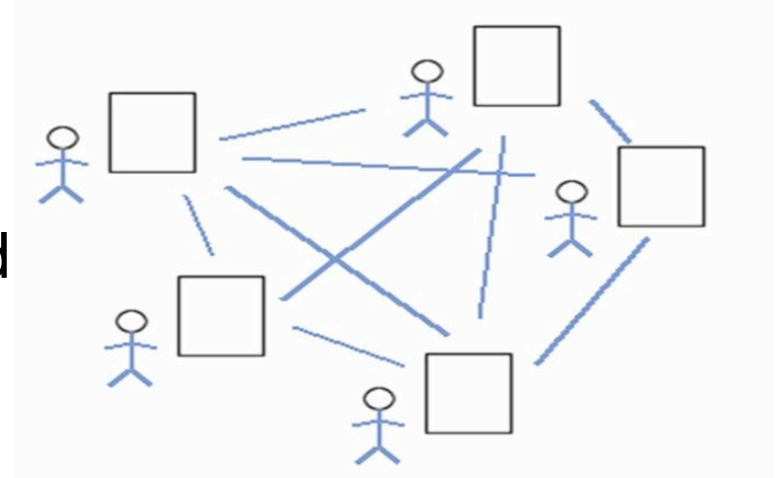

February 13, 2014

Learning and Performance Support Systems

National Research Council Canada
Conseil national de recherches Canada

Canada

Highlights

- Draft Implementation Plan has been completed and is being reviewed and revised

- Most of the projects have received Sigma A-Codes

- Project leaders receiving training

- Program workshop scheduled for February 25-27

- Program-wide use case exercise is under way

Projects

- Resource Repository Network (RRN) – Chaouki Regoui to become interim project lead

- Personal Cloud (PC) - working on project documentation, environmental scan, brainstorming on wiki

- Personal Learning Record (PLR) – focus is on use cases, high-level requirements

- Personal Learning Assistant (PLA) – later start date, beginning work on use cases

- Automatic Competence Recognition and Development (ACDR) – Focus on automatic clustering, using sequence mining on data
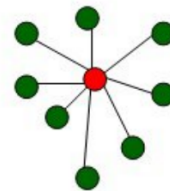

NRC·CNRC

Projects (2)

- Common Framework (CF) – working on use cases, developing specifications for hosted system
- SSHRC – Finished; follow-up possible
- MOOC-REL – site transferred to mooc.ca, gRSShopper about 70% bilingual

Competition   Collaboration   Cooperation
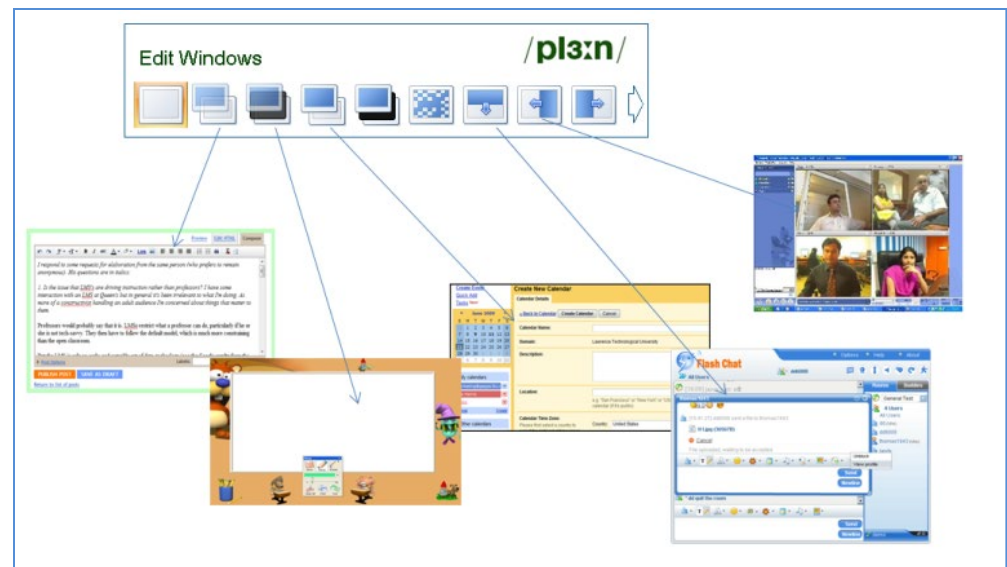

~19th C   +/- 20th C   21st C

Commercialization and Implementation Projects

- Meggitt – expecting statement of requirements February 21st leading to technical discussions and use cases
- D2L – February 18 - Knowillage LEArning Path (LeaP) demo and discussion of NRC's potential role
