

Personal Learning in a Connected World: Learning and Performance Support Systems

Stephen Downes

September 18, 2014

Riyadh, Saudi Arabia

<http://www.downes.ca/presentation/348>

Yes, we can predict the future

I took this picture yesterday knowing I would want to use it in this presentation today.

In 1998 I predicted...

- High-speed wireless access
- Importance of audio and video
- The iPad (even got the name right)
- Learning objects (called 'modules')
- Learning management systems
- Personalized education

*The Future of Online Learning:
Ten Years On*

Stephen Downes

How do we predict the future?

- We predict the future the way we understand the past: by reading the signs
- This is also how we understand the world in general, and how we learn

Learning is a form of recognition

- It's what we do naturally, as humans, from the day we are born
- And it's something that grows and evolves into a complex set of basic literacies, including pattern recognition, critical thinking, action and behaviour, awareness of context, inference and imagination, and change (the 'critical literacies')

The learning process is interactive

- Aggregate
- Remix
- Repurpose
- Feed Forward

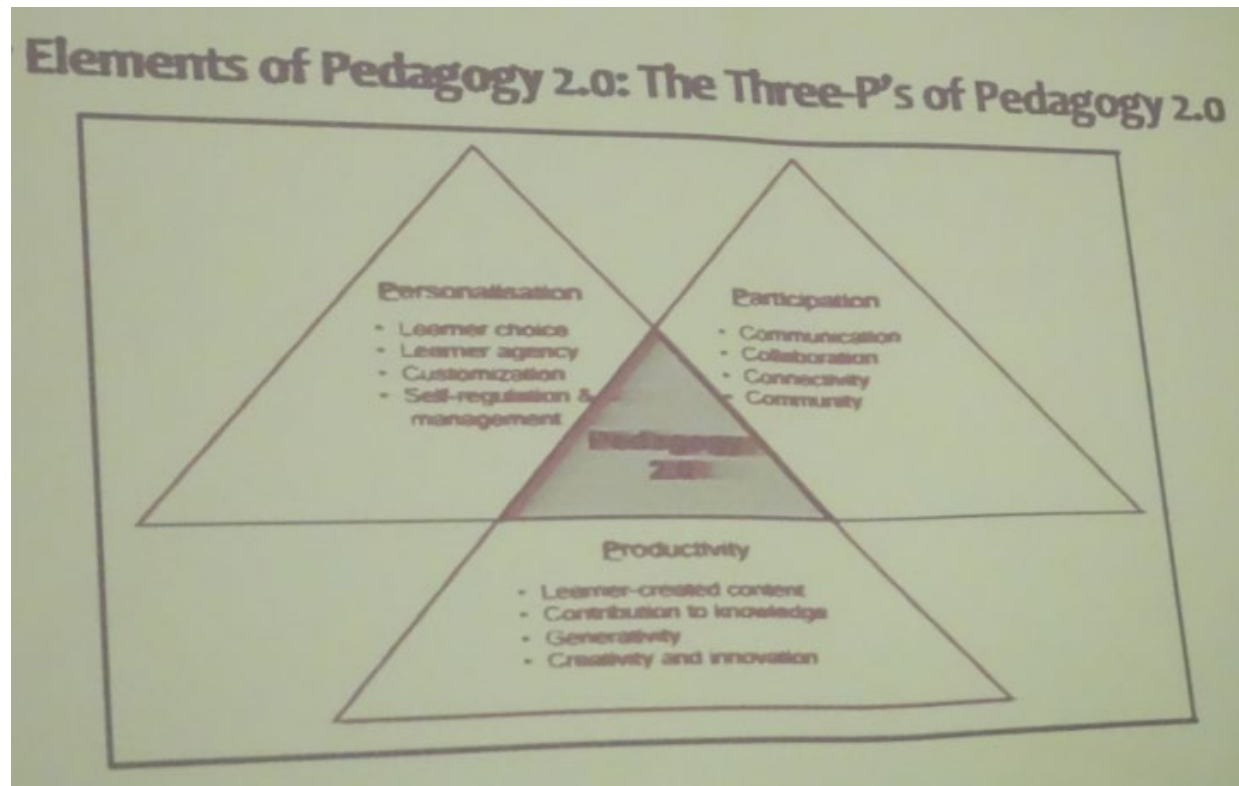

To teach is to model and demonstrate,
to learn is to practice and reflect

This is the basis of our approach to learning technologies

- 1999 – Learning communities
- 2001 – The learning marketplace
- 2004 – E-Learning 2.0
- 2005 – Learning Networks / Connectivism
- 2005 – Open Educational Resources
- 2008 – MOOC
- 2010 – Personal Learning Environments
- 2013 – LPSS

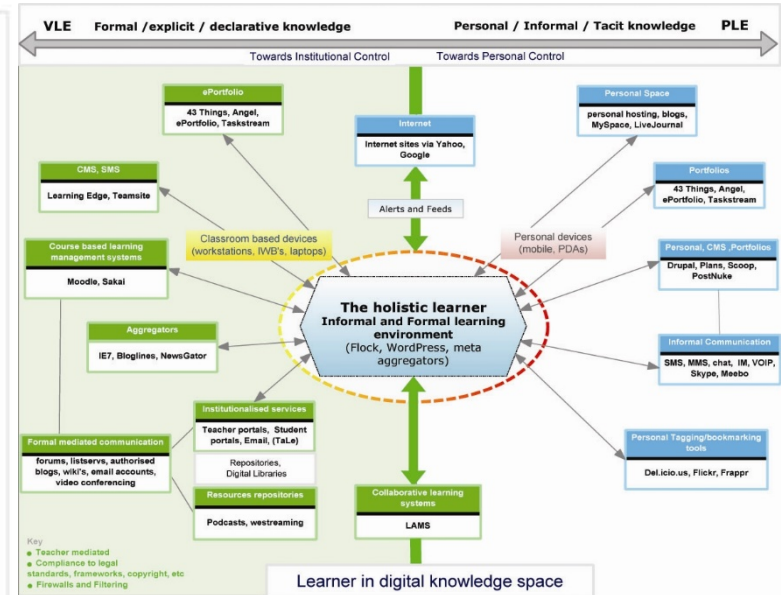

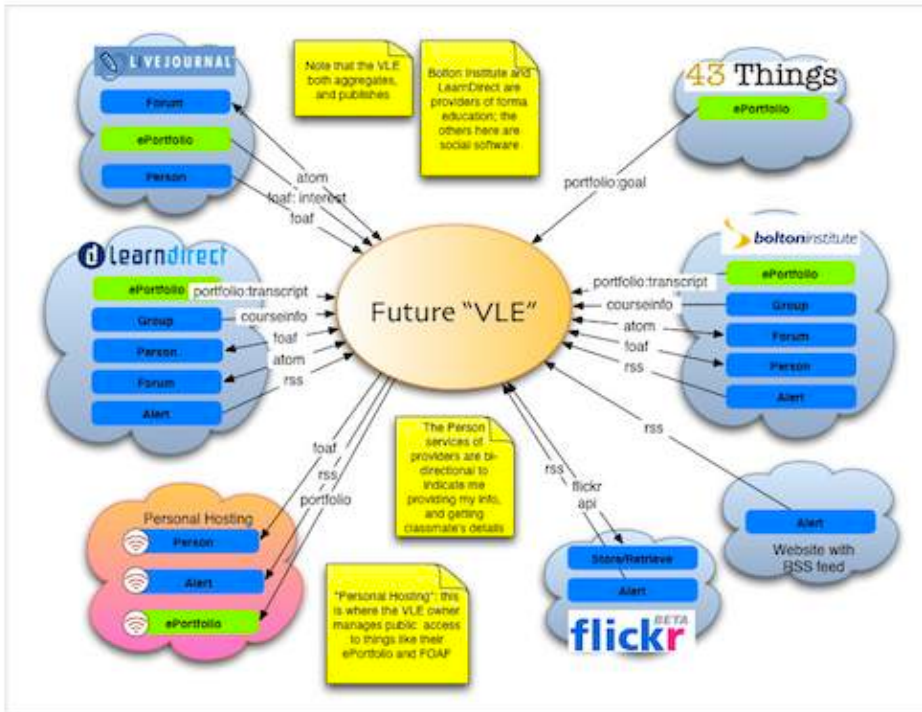

You can also see it in Pedagogy 2.0

This is known generally as the 'Personal Learning Environment' (PLE)

- The PLE as concept
- Web 2.0 supported PLEs
- Game-based approaches and 'quantified self'
- Mobile learning
- The PLE as an assessment tool

Learning and Performance Support Systems

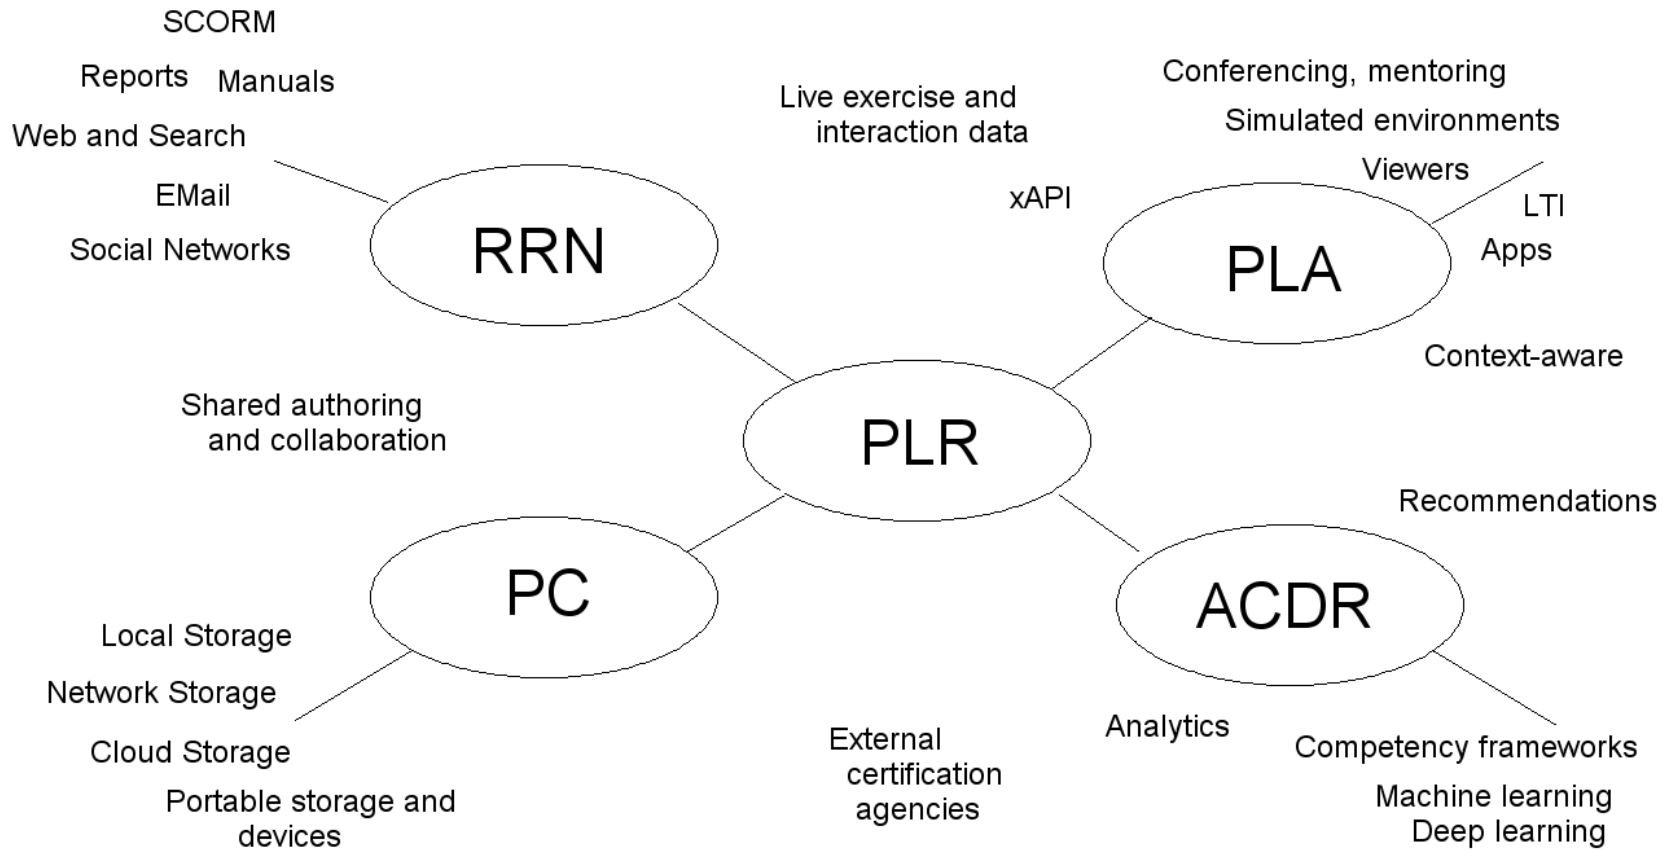

- It's a network of personal learning environments...
- ... connected to a large array of learning services

Core Technology Development Projects

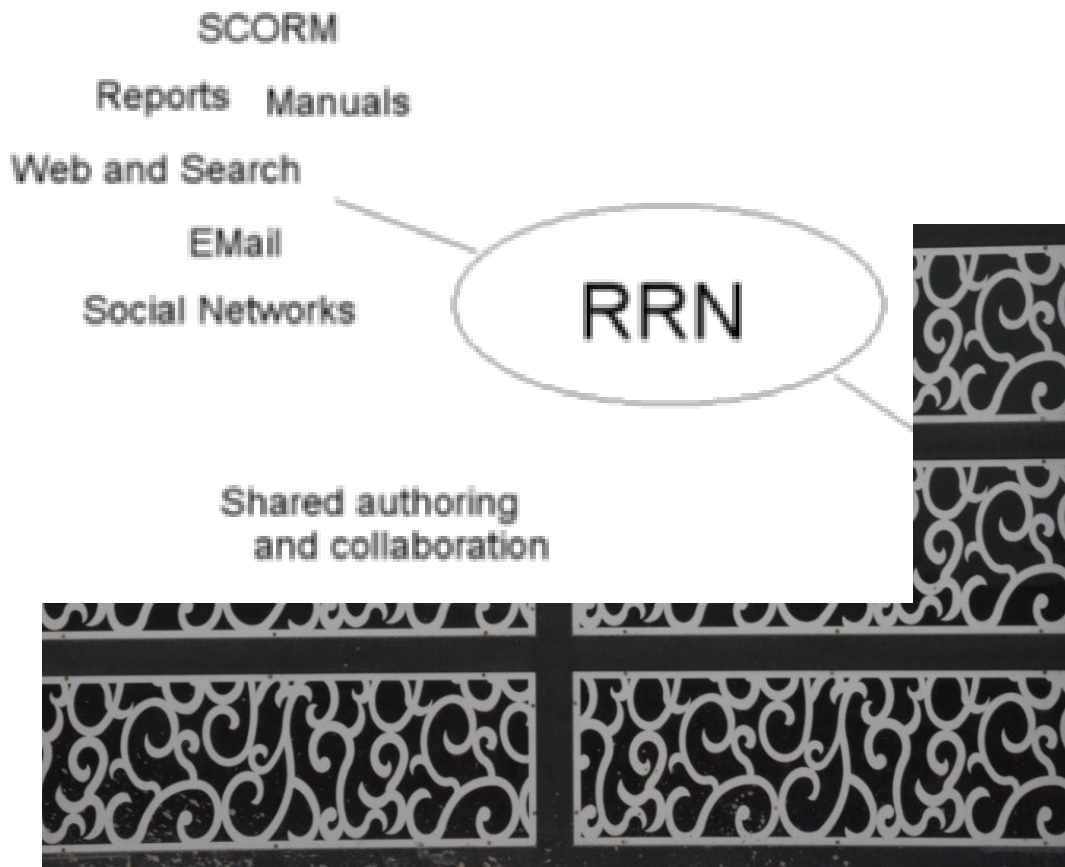

- Learning services network and marketplace
- Automated skills development and recognition
- Lifetime management of learning and training records and credentials
- Personal learning assistant to view, update and access training
 - Learning as a cloud service and deep integration with external systems

LPSS Core Projects

Resource Repository Network

- Manage and discover list of sources and resources
- Maintain authentication and credentials
- Support APIs and metadata standards
- Gather, analyze and sort resources and/or metadata

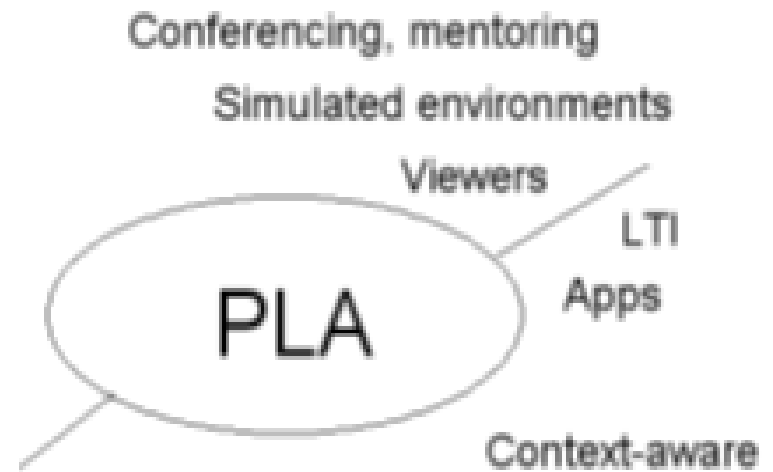

Personal Cloud

- Manage list of local and remote storage systems
- Maintain security, encryption, authentication and credentials
- Include local or personal device storage
- Manage and synchronize resource sets and data

Personal Learning Assistant

- Collect contextual information for system
- Display resources of various formats, including SCORM, LTI, etc.
- Support (scaffolded) authoring environments
- Project LPSS capacity into external software and devices

Competency Recognition and Development

- Import or create competency definitions
- Analyze interactions for skills and learning gaps
- Support development of learning plans
- Provide resource and service recommendations

Personal Learning Record

- Collect full record of interactions with all resources, external systems
- Support learning activity data exchange formats (eg. xAPI)
- Collect and present a person's personal portfolio
- Display certifications and credentials (eg. badges)
- Maintain 3rd party certification

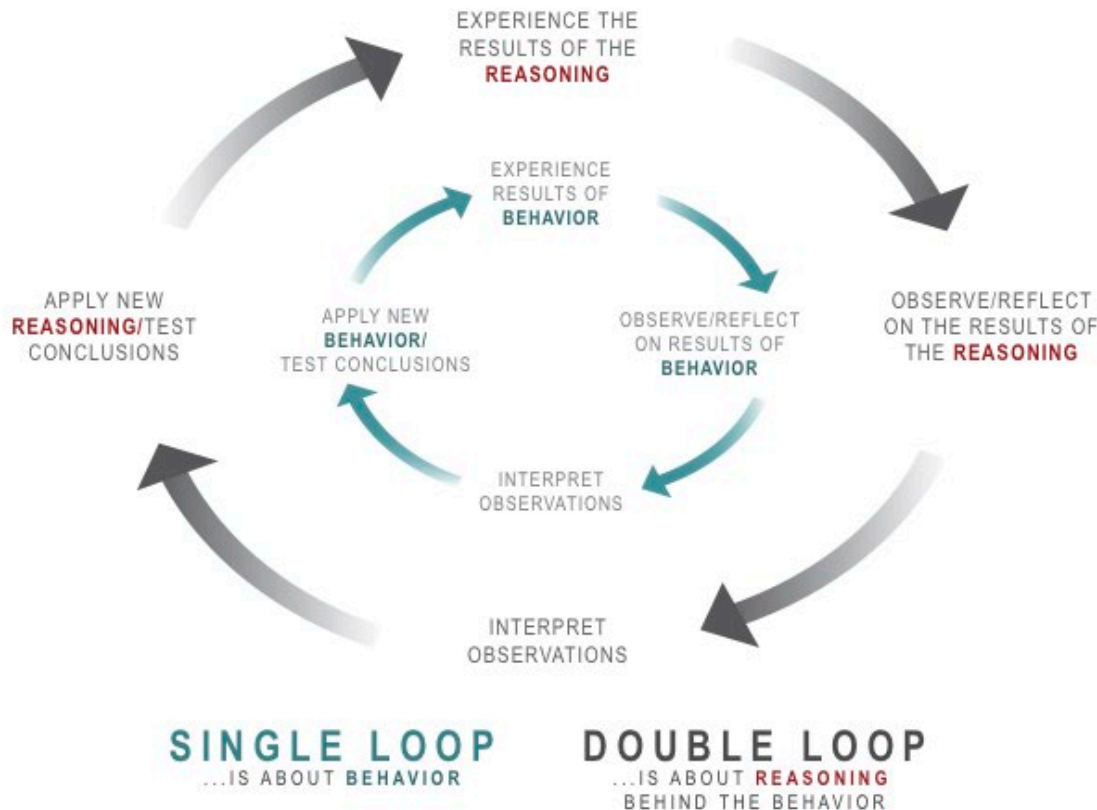

Implementation – from MOOC to Personal Learning

- MOOC-REL (OIF)
- ALECSO
- MINT
- SHARE
- Badges
- Simulator
- Workplace T&D

Implementation Projects

Ultimately, the objective is to support individual learning in a network

<http://integralleadershipmanifesto.com/manifesto/making-subject-object/>

Launch

- Limited beta starting at the end of September
- Hosted service offered at <http://lpss.me>
- Slow roll-out of capacity over next 18 months
- Development of partnerships and capacity building projects

Why is this important?

- Because technology is *not* just a tool
- It gives us the capacity to do new things (the ‘affordances argument’)
- It represents an extension of our perceptions (the McLuhan argument)
- “We shape technology, and then technology shapes us”

What kind of learner we become depends on what kind of learning technology we choose
