Iranian Conference of Health Professions Education
(ICHPE)

May 18-20, 2022

Although only 15 years old, Massive Open Online Courses (MOOCs) have captured the imagination of online learners.

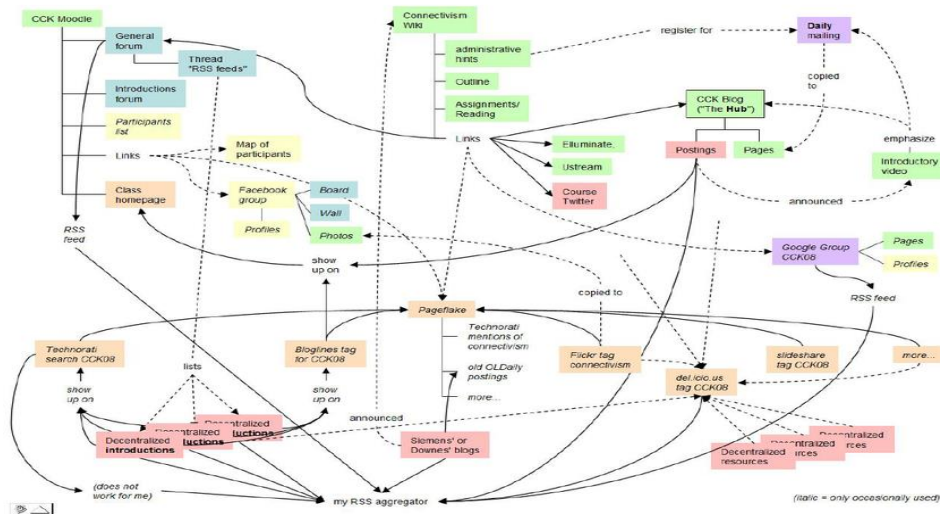

Image: <https://www.codlearningtech.org/2015/11/23/5-questions-what-you-need-to-know-about-moocs/>

Original cMOOC

Based on the idea of free access and open educational resources (OER), MOOCs enabled teachers and instructors to reach thousands of students in a single class.

The *c* in cMOOC stands for *connectivist*.

Connectivism is the thesis that knowledge is distributed across a network of connections, and therefore that learning consists of the ability to construct and traverse those networks

Stephen Downes, 2022, Connectivism.

xMOOC

The **x** in xMOOC stands for **eXtended**

Image: Eisa rezaei, 2018, Teaching And Learning Models in MOOCs.

<https://www.slideshare.net/rezaeieisa/teaching-and-learning-models-in-moocs>

The xMOOC adapted video, cloud technologies and artificial intelligence to automate course delivery to massive audiences

The xMOOC

Early MOOCs faced pedagogical challenges, however. Students needed to be able to manage their own learning, and the lack of personal contact and community resulted in low completion rates.

A study “found that efforts to put ‘interventions’ at the front of MOOC classes did not boost completion rates, even though the authors had good reason to think they would.”

Average student activity (count of course platform events) in the first 3 wk after exposure to each intervention. Points show covariate-adjusted means on a logarithmic scale (to match the log-transformed outcome in the regression model) with cluster-robust SE bars.

With the recent pandemic forcing much learning to move online, educators have been catching up with MOOCs. They are bringing with them the sense of interaction and community they develop in the classroom and moving it online.

Teaching in a Digital Age

MOOC providers are learning from the experience of distance learning, as for example from the SECTIONS model

Collaborative Online Document Authoring

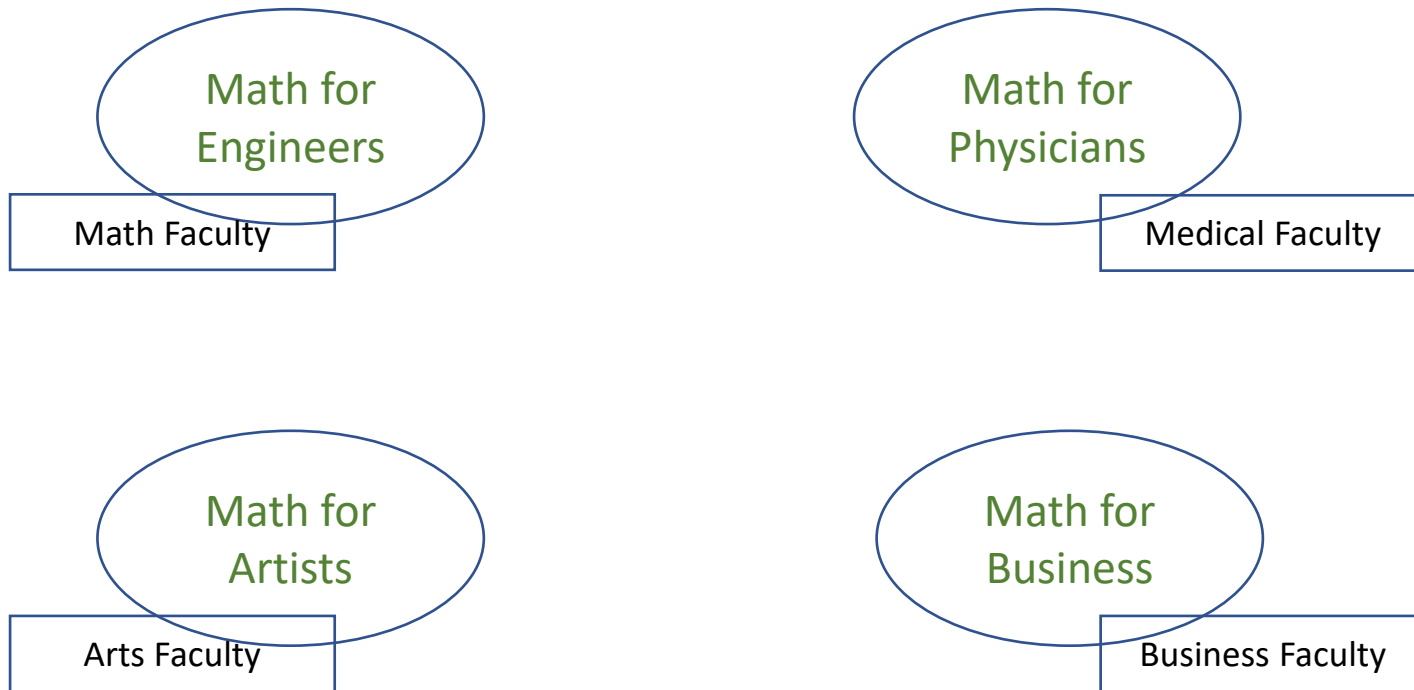

Roles:	Activities:
Writer	Brainstorm
Consultant	Converge on a plan
Reviewer	Outlining
Scribe	Drafting
Facilitator	Reviewing
	Revising
	Copyediting ¹
Document control methods:	Writing strategies:
Centralized	Single author (i.e., scribe)
Relay	Parallel writing (divide and conquer)
Independent	Reactive writing
Shared	Parallel writing (different roles)
	Sequential writing
Work modes:	Mixed mode
Degree of proximity	
Degree of synchronicity	

Many examples of collaborative writing as note-taking, assignment, writing project, etc

Massive Open Online Simulation (MOOS)

Creating a MOOC in the multiverse...

Astra, et.al., 2022 Massive Open Online Simulation (MOOS) of physics concepts microscopic for improving creative thinking

https://www.researchgate.net/publication/350911228_Massive_Open_Online_Simulation_MOOS_of_physics_concepts_microscopic_for_improving_creative_thinking

Defining the Multiverse

- **VR (Virtual Reality)** uses a headset or viewing device I
- **AR (Augmented Reality)** uses a see-through viewing device
- **MR (Mixed Reality)** is a merging of virtual and real environments
- **XR (eXtended Reality)** is a term that refers to VR, AR and MR technologies in general.
- **The Metaverse** includes all XR technologies and combines it with persistent digital objects
