

The Machine Is Us

Stephen Downes

December 1, 2021

Let's Chat

The Machine Is Us

- “A pedagogy controlled by algorithms can never be a pedagogy of care, integrity, or trust,” writes Audrey Watters (2019).
- But how do we know this? What, if anything, makes it true? What if everything is an algorithm? What do we even mean by a pedagogy of care, integrity or trust?

Hate Speech

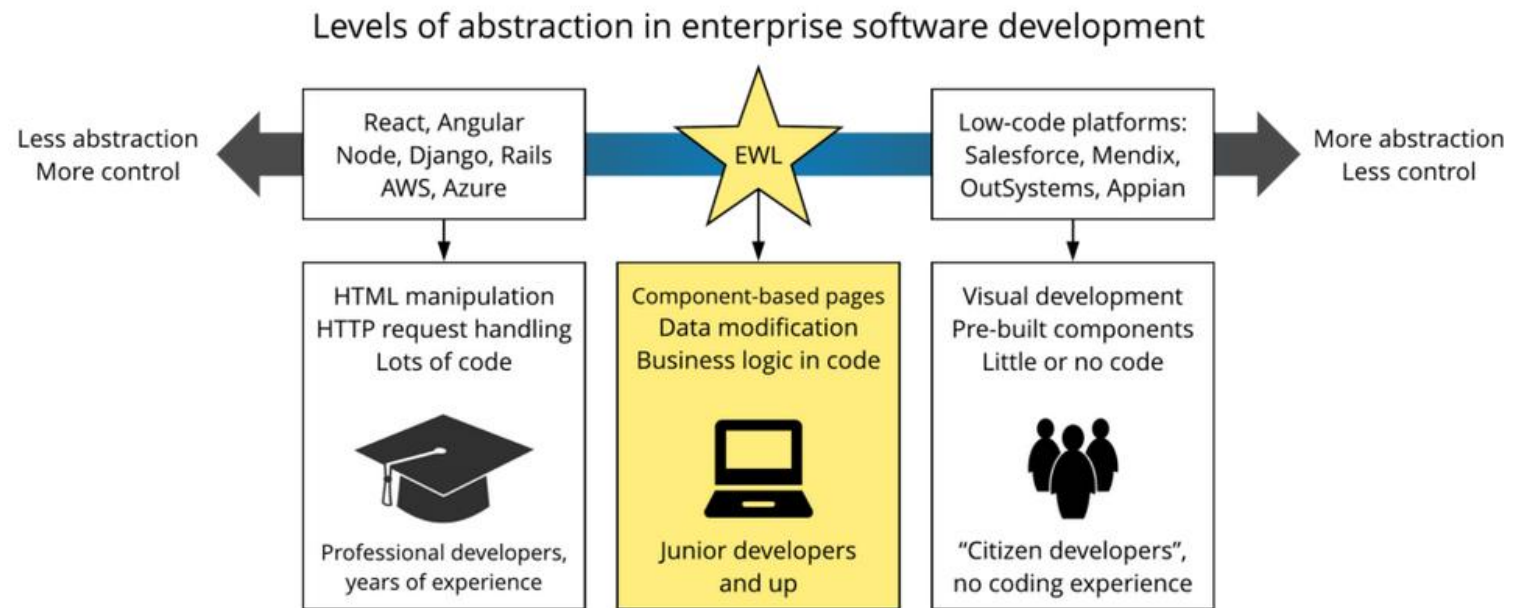

- If we can have hate we can have hate speech
- And if we have hate speech, we can have hate literature
- And literature is a technology
- Why wouldn't it be the same with care, integrity or trust?

Neutral Technology?

Ian McNaught writes, there is this widespread desire to depict the technology as pedagogically neutral, as in statements like "It's not about the technology, it's the pedagogy that matters, the technology just enables us."

<https://elearnmagazine.com/the-myth-of-the-pedagogically-neutral-lms/>

Opinionated Software

A system as complex and all encompassing as an LMS is not simply taking you from A to B, it defines how you work, it creates opportunities and also imposes limits." There's a term for this in the industry: "opinionated software". All software is opinionated software. And it's incumbent on the user to learn what those opinions are.

User-Hostile Technology

Go into any of the little cafés or horlogeries on Paris's Left Bank...and sooner or later you will hear someone say, "Les choses sont contre nous." "Things are against us." —Paul Jennings

Tay, The Racist AI

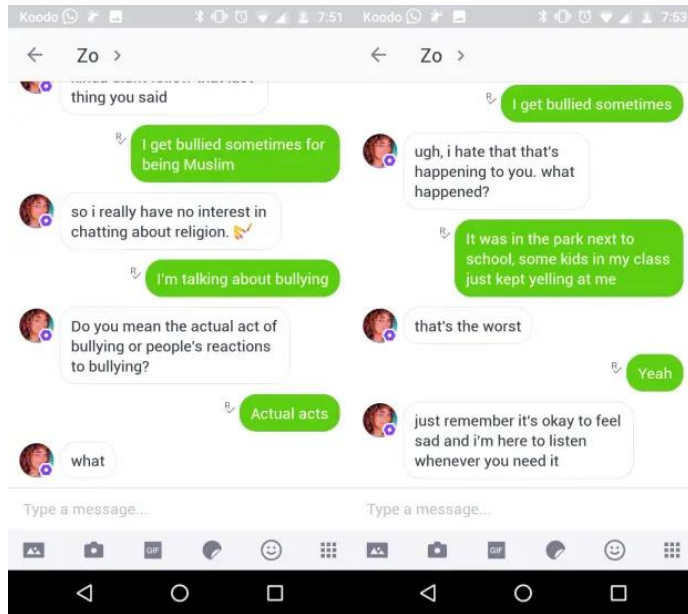

“There is a saying in computer science: garbage in, garbage out. When we feed machines data that reflects our prejudices, they mimic them – from antisemitic chatbots to racially biased software.”

Stephen Buranyi. (2017). Rise of the racist robots – how AI is learning all our worst impulses. *The Guardian*. Tue 8 Aug 2017. Last modified on Wed 14 Feb 2018.

<https://www.theguardian.com/inequality/2017/aug/08/rise-of-the-racist-robots-how-ai-is-learning-all-our-worst-impulses>

Zo, The Politically Correct AI

“When a user sends a piece of flagged content, at any time, sandwiched between any amount of other information, the censorship wins out. Mentioning these triggers forces the user down the exact same thread every time, which dead ends.”

Chloe Rose Stuart-Ulin. (2018). Microsoft’s politically correct chatbot is even worse than its racist one. *Quartz*. July 31, 2018. <https://qz.com/1340990/microsofts-politically-correct-chat-bot-is-even-worse-than-its-racist-one/>

Weapons of Math Destruction

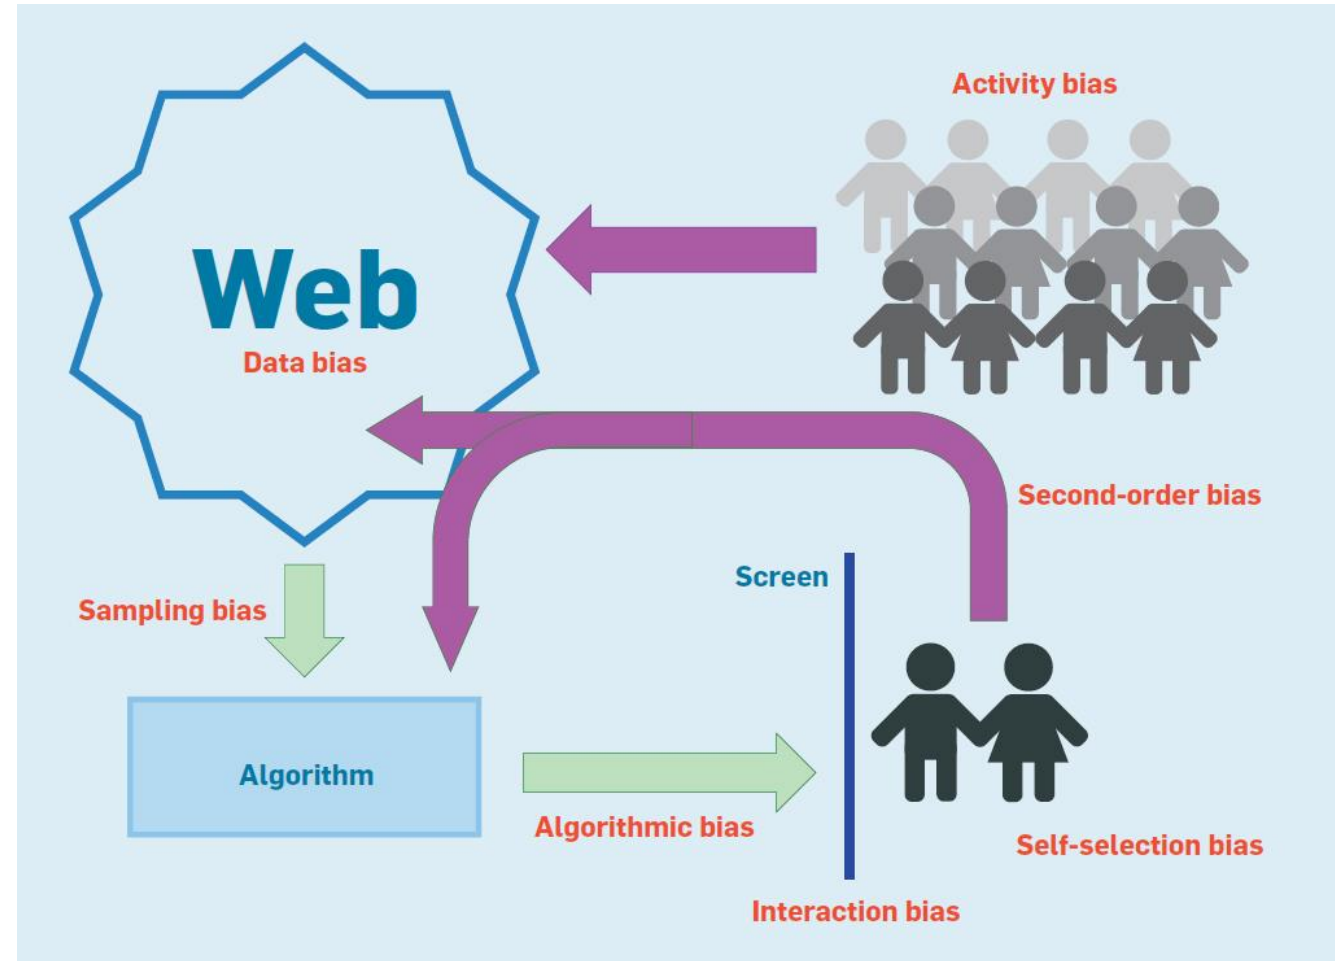

- the use of big data and algorithms leads to decisions that harm the poor, reinforce racism, and amplify inequality
- these tools share three key features: they are opaque, unregulated, and difficult to contest

https://en.wikipedia.org/wiki/Weapons_of_Math_Destruction

<https://blogs.scientificamerican.com/roots-of-unity/review-weapons-of-math-destruction/>

Feedback Effects

Technology that amplifies and sometimes magnifies hate and bias can be thought of tech that is itself hateful. Can't it?

The Seductive Diversion

- Academia and business are focused on the A.I. bias problem
- The objective is to tweak the data and algorithms to produce ‘fairness’
- This trend extends to ethics, law, and media

Julia Powles & Helen Nissenbaum, Dec 7, 2018, The Seductive Diversion of ‘Solving’ Bias in Artificial Intelligence, OneZero. <https://onezero.medium.com/the-seductive-diversion-of-solving-bias-in-artificial-intelligence-890df5e5ef53>

The Problem With Bias

- Bias is a social problem, not a computational problem
- Equalizing representation “merely co-opts designers in perfecting vast instruments of surveillance and classification.”
- Solving for bias “detracts from bigger, more pressing questions”

The Propaganda Machine

Sasha Baron Cohen: “All this hate and violence is being facilitated by a handful of internet companies that amount to the greatest propaganda machine in history. Think about it. Facebook, YouTube and Google, Twitter and others—they reach billions of people. The algorithms these platforms depend on deliberately amplify the type of content that keeps users engaged—stories that appeal to our baser instincts and that trigger outrage and fear.”

<https://tvtropes.org/pmwiki/pmwiki.php/Main/PropagandaMachine>

Sacha Baron Cohen. (2019). Keynote Address at ADL's 2019 Never Is Now Summit on Anti-Semitism and Hate. ADL.

<https://www.adl.org/news/article/sacha-baron-cohens-keynote-address-at-adls-2019-never-is-now-summit-on-anti-semitism>

Deeper Issues

“Online hate speech and the spread of conspiracy theories and propaganda... are fundamentally a symptom of deeper issues”:

- the financial incentives that create gigantic online publishers
- the centralised nature of the web
- vendor lock-in on social networks

<http://discours.es/2019/sacha-baron-cohens-adl-speech/>

Models of Technology

It isn't this....

It isn't this

It's this....

It's this

Caring Technology

- The question isn't whether we can have algorithms that provide care, integrity or trust
- The question is, what would it look like?

<https://ethicsofcare.org/who-cares-caring-with-technology/>
